TO COMMEMORATE THE 100 YEARS PEACE

Minister of Labor Proposes Movement to International Amity—Premier in Accord With Suggestion.

Ottawa, July 5.—The suggestion made by Hon. Mackenzie King at Harvard commencement last week that Canada and the United States should fittingly commemorate the hundred years of peace between the two countries by the erection and dedication of some striking international monument is likely to bear fruit in joint action by the governments at Washington and Ottawa. It is known that Sir Wilfrid Laurier is thoroughly in accord with the suggestion of the minister of labor and it is not at all improbable that steps will be taken by the Canadian government to invite the co-operation of the United States government in arranging for a celebration of the hundredth anniversary of the close of the war of 1912-14. That will be to the whole world a striking object lesson in victory of peace as opposed to that of war in settling international differences. It is felt that the time is opportune for the new world with its hundred years of peace and its three thousand miles of international boundary without a gun or fortification to point in some effective way a moral to the armed camp of Europe.

ACROSS THE WEST ON NEW RAILWAY

(Continued from Page Four)

town is Vaux, with 200 people and two elevators.

Progressive Watrous. Watrous is also in the wheat belt and has already two elevators. The population of the town is estimated at 400 people who are most enterprising. One of the marks of prosperity being automobiles. A couple of miles away from the town is Little Manitow lake, which is famous for the medicinal properties of its waters. Already a Sanatorium is being erected and a large building is being erected in Watrous where the baths can be taken. A similar provision is to be made also at Saskatoon. The shores of the lake are for the most part high, but there are good sand beaches for bathing and will speedily. It would appear that a hotel built at the lake would be close enough to the town to attract many summer visitors in search of health. The analysis of the water gives the following in grains per gallon of health: calcium sulphate 104.86; magnesium sulphate 63.42; sodium chloride 106.38; potassium sulphate 116.42; sodium sulphate 50.52; sodium chloride 106.38. The water has a taste similar to Epsom salts but when boiled down gives a saline similar to glycerine. It is extremely buoyant and it remarkably easy and safe for swimming. The deepest place in the lake is 30 feet and it will furnish good opportunity for bathing as it is 11 miles long and nearly a mile wide.

West of Watrous is a rich level country about 30 miles and this is probably one of the best districts along the line. It is settling rapidly and good towns are springing up along the line. The town of Young (mileage 422) has 200 people and two elevators have already gone up, while also miles farther west is Zebra, with the same number of elevators but with 75 people. Altona (mileage 438) has 250 people and is building rapidly. There are two elevators at this point as at Bradwell, eight miles farther west where there is a town of 200 people. At Clavet (mileage 439) there is a good town of 100 people and one elevator has been built there. There is no settlement in town until 30 miles have been passed, where the little town of Grandview is reached, where 50 people are located. Maxwell and Anquith have no settlement but an elevator has been built at each place. Anquith is close to the town of the same name on the C. P. R. and they will no doubt be one near day in the future.

At Assiniboia there are 50 people and one elevator, while at Kinley (mileage 581) there is a town of 250 people and two elevators have been built. Six miles farther west is Leroy, named after Dr. Leroy of Winnipeg, where there are two elevators and 300 people. The C. P. R. crosses the Saskatchewan river two miles west of Earl, where the bridge is 1,200 feet long and 75 feet high.

Saskatchewan Wheat Land.

Bigger is a town of about 200 people and as it is located in a country that has considerable sand there will probably not be sufficient wheat land to cause rapid settlement for some time. There is little settlement for some miles west of Bigger (111) lands (mileage 330). Collette (mileage 330) are reached, each of which has a population of 200 people, in a rural belt in the fertile town. West of here there is a splendid wheat land which greatly pleased Dr. J. Anderson, the government expert. The fact that it is not a divisional point, there are already 200 people there. Two elevators have been built, as at Riford, just east of here. Fifteen miles west of Scott is Unity, another wheat town of 200 people, and two elevators have been built. South of Scott is the Training Lake district which has been settled through the efforts of the L. N. S. Land company. The lake is 30 miles in length. The rich land extends for seven miles north and fifty miles south in this district so that these two towns have a sure promise of a good future.

Westward from Scott the country becomes rolling and well suited for mixed farming. There are many lakes and swamps are numerous. At Youkers (mileage 529) marks the boundary between Saskatchewan and Alberta. The first town in the sunny province is Chaville (mileage 633) in the centre of good stock or mixed farming district and it has a population of 100. Donna has 50 people and Edgerton (mileage 627) 500 people, with a new little school, the children being taught by a lady from Ontario. At Youkers is Big Manitow lake, eight miles by twelve, and it is a good stock or mixed farming district and the water resource of the same properties as those possessed by Big Manitow lake, but they have not yet been explored.

Wainwright. Wainwright has a population of about 1,000 people, which has been increased during the railway construction to over 1,000. One of the needs of the pioneer inhabitant who can produce many demands is to protect the fruits of his exertions regarding the advent of the railway and other matters, which characteristic often prove embarrassing to the settlers from Winnipeg. Wainwright is in the centre of a fertile country and this will be a fine farming region when it is well settled. First a mile east of the town is the big park set aside by the Dominion government to protect the large buffalo herd located in Montana. The buffalo can come from the train. They have a pasture 10 miles square and are reported to be doing well in captivity. West of Wainwright there are no elevators and the steel has just reached this section building is 271 as of the 27th of July. east. Battle river is crossed nine miles from town where the steel bridge is 2,770 feet long and the trestle work for the deep cut over longer, making the entire bridge more than a mile in length. The town of Irma (mileage 641) has 75 people and one of three at Neichen (mileage 711) there is a good

town of 300 people. Bruce and Hinton (mileage 782) are at the end of the line and each has a population of about 150. One of the surprises is at Telford where there is a good town, many miles ahead of the settlement and a good farm is secured. This was as far west as the party had an opportunity to see the country, but it will all be open in a few days.

VEGUEVILLE.

Bulletin News Service. Hon. Charles McPhy, secretary of state for the Dominion, arrived in town on Wednesday and was met at the station by prominent men of the town. Several rigs were in attendance and all drove out into the country as far as a C.N.R. camp, west of the town. In the evening a banquet was given at the C.N.R. camp, at the Alberta Hotel by both Conservatives and Liberals. This is not Mr. Murphy's first trip west, and he was surprised to find so much vacant land.

The town was very quiet on Dominion Day. Many had gone to the Edmonton fair and others attended a picnic at Leroy. Quite a heavy hail storm passed over this section yesterday. The hail was not of the destroying nature of the wind was not high, and as a consequence the damage was slight. The grain not suffering at all.

Mr. D. McMillan, who is having his farm now been broken for winter wheat, has the misfortune to be thrown out of his rig and badly injured. His team took fright at the circus parade and bolted, throwing Mr. McMillan heavily to the ground. Not much damage was done, but the horse was caught. Judge Taylor was down sitting on the appeal of the C.N.R. against their assessment on certain lands held by them. Mr. Short, of Short, Cross & Bigger, appeared for the C.N.R. No decision was given.

Miss Bernice Leish, who has been teaching the Portuguese school, left for her home in Strathcona.

MOSSIDE.

Bulletin News Service. Mr. John Cameron, timber inspector, arrived through here last week. He has recently been to Lesser Slave Lake.

A new store and post office is a great convenience to our people. Our school is dismissed for holidays. The teacher is taking in the examination in Edmonton next week.

Mr. Barney, of Peavine Prairie, has just made a trip to Edmonton and back for supplies.

Mr. Steeking has come to town to take a position in the power house. Copsious rains have watered our crops and things are growing finely.

PADDLE RIVER.

Bulletin News Service. A meeting was held in the Paddle River Hall on June 26th for the purpose of forming a local improvement district, but failed to accomplish anything.

Read Inspector Bond visited the district last week and it is to be hoped that some improvements to the trails will make the use of this energetic gentleman's inspection. Rev. J. W. Wright has arrived here via Rev. J. N. Hamilton, who is taking charge of the Methodist Church in the Independence district.

Government Land Guide J. Kynson for Edmonton, having located a large party of new settlers. Mr. Kynson has done most successful this season, very few of the many homestead seekers have brought out having failed to obtain suitable homes.

Trails are in fair condition and local stockholders are taking advantage of the fact and have several freighters on the track. Crops are excellent and little or no frost has been done by last week's light frost. Paddle River, June 25.

KEEPHILLS.

Bulletin News Service. The weather of the past week has been very favorable for the crops, which show a marked improvement. The customary June rains this year were conspicuous by their absence. This year, however, the Woodlands school picnic will take place on Dominion day, as arranged, but having already been postponed several times owing to inclement weather. A picnic menu should be very enjoyable as the wild strawberries are already in luxuriant profusion and other wild fruit coming on well.

Kellogg's is "The Sweetheart of the Corn"
All the Food-value of Corn is Secretly retained in Kellogg's Toasted Corn Flakes. It is toasted under 300 degrees heat, evaporating the moisture, (moisture is useless) and transforming the Starch into Pre-digested Grape Sugar. It is impossible to do this without Kellogg's Secret Process.

Kellogg's with milk or cream makes a delightful dish. Be sure it's Kellogg's. Made in Canada. 10c. All Grocers.
